

Designing and implementation of refrigeration and engineering systems

13 years

of experience in the designing market

850

completed projects

160

employees

7000 M²

area of own production and storage

01

SYSTEMS DESIGNING

Engineering systems designing service

02

PRODUCTION

Industrial refrigeration equipment with natural refrigerant

03

COMPLEX SUPPLY

Set and delivery of engineering equipment and consumables

04

SYSTEM INSTALLATION

Full-service installation of engineering systems and networks

05

SERVICE MAINTENANCE

Regular qualified equipment service

Our production

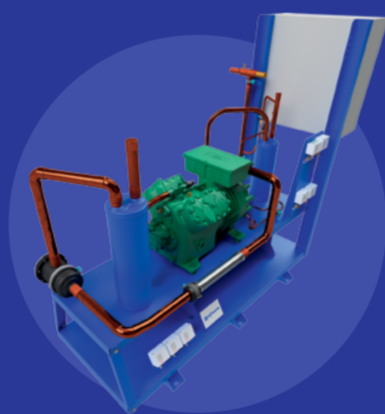

Refrigeration unit series I-CU

Refrigeration unit series I-CC

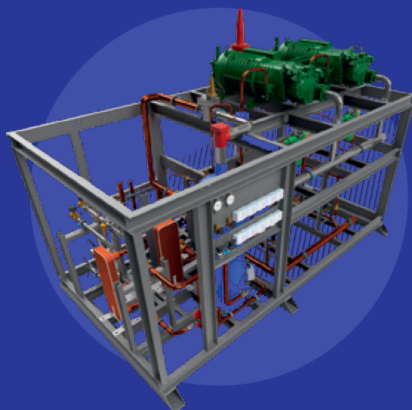

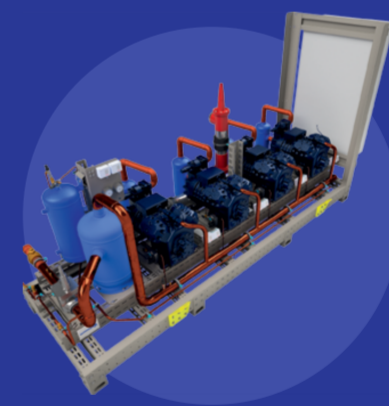

Reversing station series I-RU

Pumping unit series I-PU

Single-compressor units based on semi-hermetic reciprocating compressors

Single-compressor units based on semi-hermetic screw compressors

Multi-compressor units based on semi-hermetic reciprocating compressors

Multi-compressor units based on semi-hermetic screw compressors

Single-compressor units based on hermetic scroll compressors

Multi-compressor units based on hermetic scroll compressors

Our production power

16 Industrial refrigeration units per month

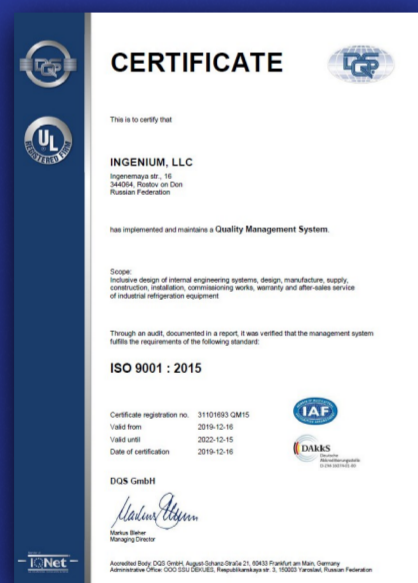

The possibility of securing stocks at the service center in the importing country

the scope of delivery depends on the terms of reference

10 production time

working days

Certificates

12 months warranty service period

Our clients
